CLAIMS

I Brian D. Johns Take the Following Claims to My Invention That Is A Tire Pressure Monitoring System That Fits On Your Valve Stem with the Following Claims.

- 1.) This is tire gage transmitted signal monitoring device that will fit on existing design valve stems and is able to stay on the valve stem at all times even while feeding air into and into tire but can be removable as needed.
- 2.) The manual tire pressure gage devices that monitor the air pressure in your tire by pushing the figures down an internal gage stick pops out which tells you if your pressure is ok and is capable of fitting any existing valve stems.
- 3.) The manual tire pressure gage with a digital display screen that will work with threaded valve stem adaptor which will screw onto existing valve stems and be monitored from outside the vehicle only.
